

IEEE Standards Board Action on PASC Projects

The following table only lists the standards board meeting at which approval was actually given to each PAR. For example: if a PAR was submitted in March, but additional information was requested by NesCom, who then approved the PAR in June, this table will list only the June approval of that PAR.

Key -- the NesCom action is for initial approval unless one of the following:

- (rev) - a revised version of the PAR was approved
- (ext) - an application for a 4-year extension was approved
- (wdrw) - a previously approved PAR was withdrawn
- (*1) - approval date = date the recirculation closes if there are no additional comments
- (*2) - the 1387.2 revision was not approved since it had already been approved by RevCom. However, it was decided the title could be administratively changed.
